THROUGH HARDENED BOLT-ON EDGES

For Corner Guard System & Rock Bucket

Standard quality

With A.F.M. (Antiwear Facing Material)

Important Reasons why and when BOLT-ON Edges should be used:

- they **are more economical** than edges complete with teeth when penetration is not a problem. Stockpiling and loading loose material are ideal applications;
- they **protect and extend the life** of your bucket edges and corners;
- they **are through hardened to 500 HB** and they have the **same steel composition** as the O.E.M. (Original Equipment Manufacturers), therefore same durability;
- they can be **replaced or rotated quickly and inexpensively**, with no burning or welding. Consequently a **big saving of time** and money;
- the ones **with A.F.M.** (Antiwear Facing Material) are **ideal where sand, gravel and other abrasive materials wear edges prematurely**; with A.F.M. are recommended in low to moderate impact applications.

TECHNICAL INFORMATION

Standard quality

30MnCrB5H

Material Specification

With A.F.M.

Tungsten Carbide Particles

Mechanical Properties

Surface Hardness	460÷520 HB	Hard Facing Material	1050÷1420 HV ₁
Tensile Strenght	1530 MPa min.		
Yeld Strenght	1300 MPa min.	Martensitic Matrix	730÷800 HV ₁ (62÷65 HRC)
Elongation	7% min.		
Impact Strenght (DVM) to 20°C	40 J/cm ² min.	Base Material	460÷520 HB (49÷52 HRC)

**T O U G H
C O M P O N E N T S**

A.F.M.

ANTIWEAR FACING MATERIAL

A.F.M. is a coating made of extremely hard tungsten carbide particles, bonded with high martensitic alloy, which forms a protective shield on the more exposed wearing surfaces of the G.E.T. parts.

Compared with no A.F.M. protected, **the shielded G.E.T. parts can last up to 3-5 times longer** in high abrasion/low to moderate impact conditions.

Comprehensibly, A.F.M. protected G.E.T. parts cost more than similar standard tools but the higher initial cost is more than compensated by the following advantages:

- **more Wear Life**, because A.F.M. G.E.T. parts last up to 3-5 times longer and consequently their costs per hour in appropriate operations are lowered drastically;
- **higher Production**, because the hard shield improves penetration and the machine is helped to improve productivity;
- **increased Machine Availability**, because longer wear life offers the big advantage to spend less time replacing Antiwear faced G.E.T. parts, consequently, reduced operating costs.

Bolt-On Cutting Edges and End Bits,

Bucket Tips, especially Heavy Duty Long Life type,

Ripper Tips, either Penetration or Centerline type,

Shouldered Adapters, like Two Strap, Flush Mount and Bolt-On type,

Corner Guard Adapters

are the G.E.T. parts that we can supply provided **with Antiwear Facing Material (A.F.M.)**.
